

ZoodeSIM

Technical Specification

Referral & Partner Program

Version 1.0 | July 2026

1. Overview

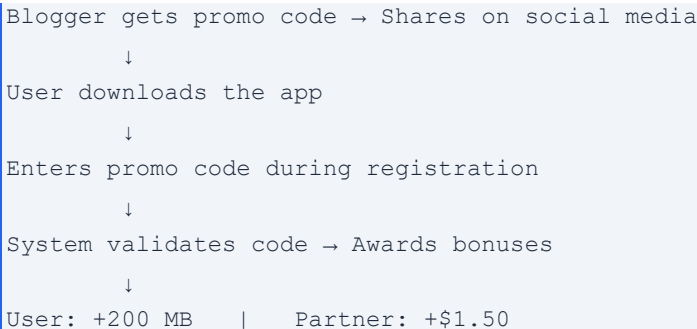

ZoodeSIM is a mobile application for purchasing and activating eSIM cards worldwide. The referral and partner program allows bloggers and partners to promote the app using unique promo codes and earn rewards for every user they bring in.

2. How It Works

2.1 Flow

- Partner (blogger) registers in the system and receives a unique promo code
- Partner shares the promo code on social media (Instagram, Telegram, TikTok)
- New user downloads the ZoodeSIM app
- During registration, the user enters the partner's promo code
- System automatically grants bonuses:
 - User — 200 MB of free data
 - Partner — \$1.50 for each successful registration
- Partner sees real-time stats in their personal dashboard
- Once the minimum amount is reached, the partner withdraws funds

2.2 Flow Diagram

3. User Roles

Role	Description	Access
User	Regular app customer	Enter promo code at registration
Partner / Blogger	Promotes the app	Personal partner dashboard
Administrator	Manages the system	Full admin panel

4. Promo Codes

4.1 Structure

- Length: 6–12 characters
- Format: letters + numbers (Latin only)
- Example: SARDOR10, JAHON20, ZOODESIM5
- Case-insensitive (SARDOR10 = sardor10)
- Unique per partner

4.2 Types

Type	Description	Example
Standard	Basic bonus for new user	SARDOR10 → 200 MB
Premium	Larger bonus for top bloggers	VIP500 → 500 MB
Seasonal	Time-limited	SUMMER26 → 300 MB (until Aug 31)
One-time	Single use only	TEST001 → 100 MB

4.3 Rules

- Each user can apply only ONE promo code
- Promo code can only be entered during first registration
- Cannot apply a promo code after registration
- Partner cannot use their own promo code
- Admin can deactivate any promo code

5. Bonus System

5.1 What the User Gets

Bonus	Amount	Condition	Validity
Data (MB)	200 MB	Enter any promo code	30 days
Discount	5%	On first purchase	7 days
Cashback	10%	On purchases over \$10	No expiry

5.2 What the Partner Gets

Event	Reward	When Credited
Registration via promo code	\$1.50	Immediately after registration
Referral's first purchase	10% of amount	After successful payment
Referral's subsequent purchases	5% of amount	Each following purchase
10 referrals milestone	+\$5 bonus	Automatically
50 referrals milestone	+\$30 bonus	Automatically
100 referrals milestone	+\$75 bonus	Automatically

6. Partner Dashboard

6.1 Partner Registration

- Partner submits an application via a special form in the app or website
- Provides: name, contact (Telegram/Instagram), link to their account
- Admin approves the request manually or automatically
- After approval, partner receives dashboard access and a promo code

6.2 Dashboard Screens

Home / Overview

- Displays promo code prominently with a "Copy" button
- Stats: total registrations, earnings, active users, available to withdraw
- Chart: registrations per day (last 7 days)

Registrations

- List of all users who registered using the promo code
- Fields: username, registration date, status, bonus
- Filter by date, search

Earnings

- Detailed history of all credited amounts
- Filter: today, this week, this month, all time
- Total earned, total withdrawn, available to withdraw

Promo Codes

- List of all partner's promo codes
- Stats per code: usage count, earnings
- Status: active / paused / expired

Withdraw Funds

- Minimum withdrawal: \$50
- Methods: bank card, Payme, Click, cryptocurrency
- Withdrawal history: date, amount, status (processed / in progress)

7. Database

7.1 Partners Table (partners)

Field	Type	Description
id	UUID	Unique partner ID

Field	Type	Description
name	STRING	Partner name
email	STRING	Email address
telegram	STRING	Telegram username
status	ENUM	active / pending / blocked
balance	DECIMAL	Current withdrawable balance
total_earned	DECIMAL	Total earned all time
created_at	DATETIME	Registration date

7.2 Promo Codes Table (promo_codes)

Field	Type	Description
id	UUID	Unique promo code ID
partner_id	UUID	Reference to partner
code	STRING	Promo code text (unique)
bonus_mb	INTEGER	MB granted to user
partner_reward	DECIMAL	Partner reward per registration
type	ENUM	standard / premium / seasonal / single
expires_at	DATETIME	Expiry date (null = no expiry)
is_active	BOOLEAN	Active or not
usage_count	INTEGER	Times used
max_usage	INTEGER	Usage limit (null = unlimited)

7.3 Promo Usage Table (promo_usage)

Field	Type	Description
id	UUID	Unique ID
promo_code_id	UUID	Reference to promo code
user_id	UUID	User who entered the code
partner_id	UUID	Partner who was credited
bonus_mb_given	INTEGER	MB credited to user
partner_reward	DECIMAL	Amount credited to partner
used_at	DATETIME	Date and time of use

7.4 Withdrawals Table (withdrawals)

Field	Type	Description
id	UUID	Unique ID
partner_id	UUID	Reference to partner
amount	DECIMAL	Withdrawal amount
method	ENUM	card / payme / click / crypto
status	ENUM	pending / processing / completed / failed
requested_at	DATETIME	Request date
completed_at	DATETIME	Completion date

8. API Endpoints

8.1 Validate Promo Code

```
POST /api/promo/validate
Body: { "code": "SARDOR10" }
Response: { "valid": true, "bonus_mb": 200, "partner_name": "Sardor" }
```

8.2 Apply Promo Code

```
POST /api/promo/apply
Body: { "code": "SARDOR10", "user_id": "uuid" }
Response: { "success": true, "mb_added": 200 }
```

8.3 Partner Stats

```
GET /api/partner/stats
Headers: Authorization: Bearer {token}
Response: { "total_referrals": 247, "balance": 142.50, "total_earned": 370.00 }
```

8.4 Request Withdrawal

```
POST /api/partner/withdraw
Body: { "amount": 100, "method": "payme", "account": "998901234567" }
Response: { "success": true, "withdrawal_id": "uuid", "status": "pending" }
```

9. User Scenarios

9.1 New User Registration

- Step 1: User downloads the ZoodeSIM app
- Step 2: Opens the registration screen
- Step 3: Enters name, email, password
- Step 4: Sees optional "Have a promo code?" field
- Step 5: Enters promo code SARDOR10
- Step 6: System validates the code in real time
 - Code found → shows "✅ +200 MB will be added"
 - Code not found → shows "❌ Promo code not found"
- Step 7: User taps "Register"
- Step 8: System creates account and credits 200 MB
- Step 9: Partner is automatically credited \$1.50
- Step 10: Partner receives a notification in the dashboard

9.2 Partner Withdrawal

- Step 1: Partner opens the dashboard
- Step 2: Sees balance of \$142.00
- Step 3: Taps "Withdraw"
- Step 4: Selects method: Payme / Click / card / crypto
- Step 5: Enters account details and amount
- Step 6: Confirms the request
- Step 7: Status changes to "Processing"

- Step 8: Admin processes the payment (1–3 business days)
- Step 9: Partner receives money and a notification

10. Notifications

Event	To	Channel	Message
New registration via code	Partner	Push + In-app	New referral! +\$1.50 credited
Referral made a purchase	Partner	Push + In-app	Referral bought a plan! +\$X commission
Milestone reached	Partner	Push	🎉 50 referrals! Bonus +\$30 added
Withdrawal approved	Partner	Push + Email	Payment of \$X has been sent
Promo code expiring soon	Partner	Push	Your promo code expires in 3 days

11. Admin Panel

What the admin should see:

- List of all partners and their status
- Approve / reject new partner applications
- Create and manage promo codes
- Set bonus amounts (MB and \$)
- Process withdrawal requests
- Overall stats: total paid out, total referrals
- Block suspicious partners or promo codes

12. Fraud Prevention

- One user = one promo code (check by email + device)
- Partner cannot use their own promo code
- IP address check at registration (block suspicious activity)
- Cannot create multiple accounts from one device
- Withdrawals above \$200 require manual admin review
- All promo code actions must be logged

13. Recommended Tech Stack

Part	Technology	Reason
Mobile App	Flutter	iOS + Android from one codebase
Backend (Server)	Node.js + Express	Fast, popular, many developers
Database	PostgreSQL	Reliable for financial data
Authentication	JWT Tokens	Industry standard

Part	Technology	Reason
Push Notifications	Firebase FCM	Free, works on iOS and Android
Hosting	DigitalOcean / AWS	Reliable, scalable
Cache	Redis	Fast promo code validation

14. Development Timeline

Phase	Task	Duration
1	Database & data models	3–5 days
2	API endpoints (promo codes, partners)	5–7 days
3	Promo code screen in the app	2–3 days
4	Partner dashboard	5–7 days
5	Notification system	2–3 days
6	Admin panel	3–5 days
7	Testing & bug fixes	3–5 days
TOTAL		~4–5 weeks

15. Important Notes for the Developer

- 💡 *Promo code should be validated in real time as the user types (with 500ms debounce)*
- 💡 *All financial operations must be logged — this is critical for auditing*
- 💡 *Partner balance must update instantly after a referral registers*
- 💡 *The partner dashboard should work as a website AND inside the mobile app*
- 💡 *Store all amounts in cents (integers) to avoid floating point errors*
- 💡 *Before paying out, verify that the referral is not the same person as the partner*
